

**For Internal NOAA/EPA Purposes
Status of Coastal Nonpoint Program
April 2015**

Higher Priority
Med Priority (Tier 1)
Med Priority (Tier 2)
Lower Priority

Highlighted "Next Steps" denotes submission pending NOAA/EPA review (or critical action needed by NOAA/EPA in OR's case). Six states (50%) currently require actions by NOAA/EPA. Some have been pending since June (HI) but most since Nov-Feb.

Status of Remaining States:

State	Remaining Conditions	Status	NOAA/EPA Staff <i>(Overall Lead Noted with *)</i>	Expiration of NA to Develop Approvable 6217 Program ¹
OR	1? (Add MM for Forestry)	NOAA/EPA disapproved 1/31/15 based on 4 elements of add MM for forestry condition. NOAA/EPA still need to review ag MMs to determine if state has met condition or if additional work is needed. Next Steps: Schedule and hold "kick off" meetings with state to go over decision and get commitment from state to address. NOAA/EPA work with NMFS on ag review.	Allison (NOAA) Don (EPA HQ) Jayne (EPA R10)*

¹ Note: Under Section 312 of the Coastal Zone Management Act, NOAA conducts routine reviews of all state coastal management programs. As part of the review process for states that still have conditionally approved coastal nonpoint programs, in 2009 NOAA began placing a "necessary action" (NA) on the state's coastal management program that states the state needs to submit a fully approvable coastal nonpoint program to NOAA/EPA five years after the state's evaluation findings are issued.
